

1. Comprobación del XAMPP

The screenshot shows a Moodle course interface for 'Centro: I.E.S. Ntra. Sra. de los Remedios'. The course content includes sections for IDE, Actividades, and Exámenes. Overlaid on the page is the XAMPP Control Panel v3.3.0. The panel shows the status of services: Apache is running, while MySQL is stopped. An error message is displayed in the console area of the control panel:

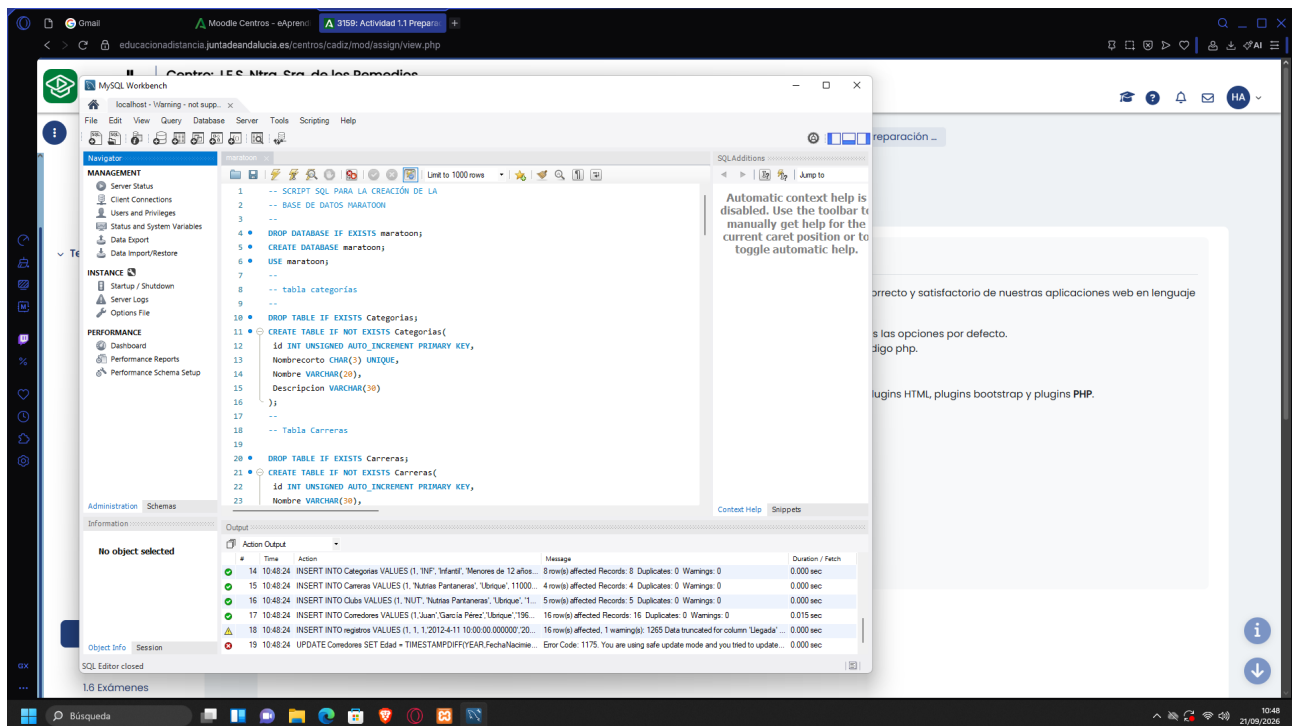

```
10:13:56 [mysql] This may be due to a blocked port, missing dependencies,
10:13:56 [mysql] improper privileges, a crash, or a shutdown by another method.
10:13:56 [mysql] Press the Logs button to view error logs and check
10:13:56 [mysql] the Windows Event Viewer for more clues
10:13:56 [mysql] If you need more help, copy and post this
10:13:56 [mysql] entire log window on the forums
10:14:00 [mysql] Attempting to start MySQL app...
10:14:01 [mysql] Status change detected: running
```

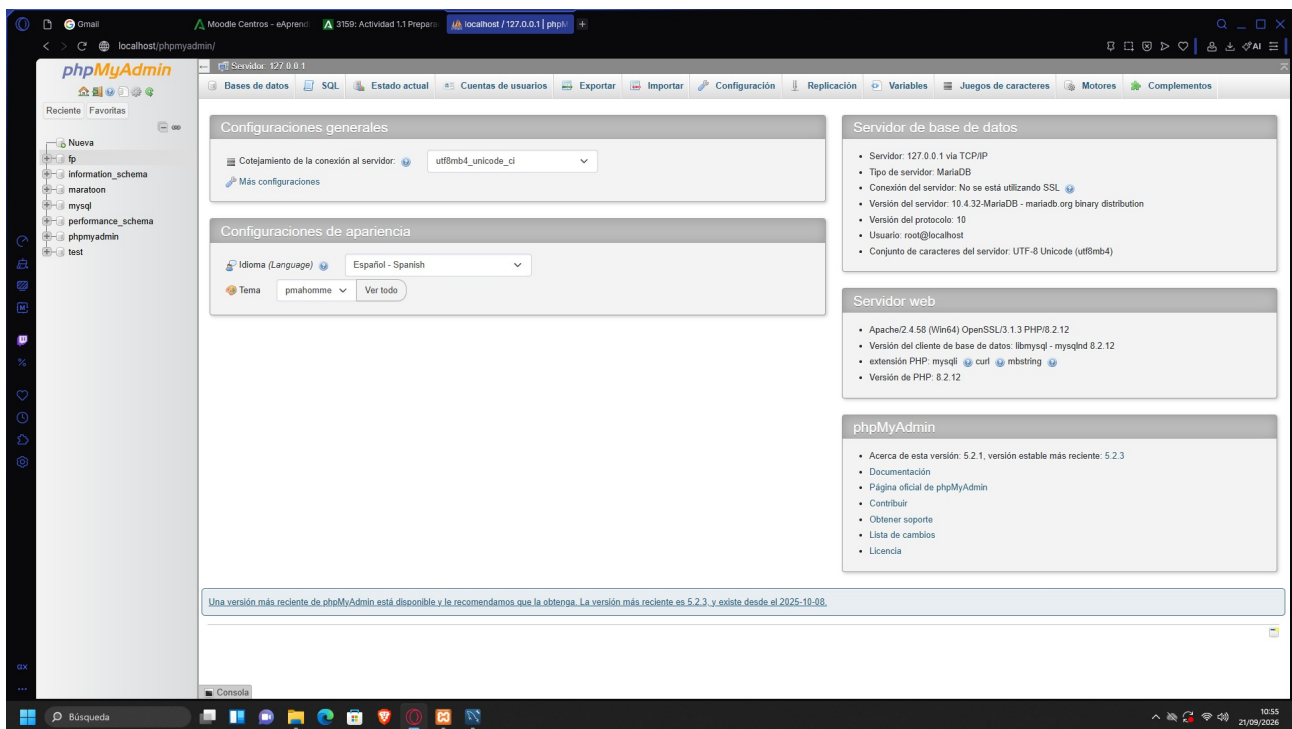

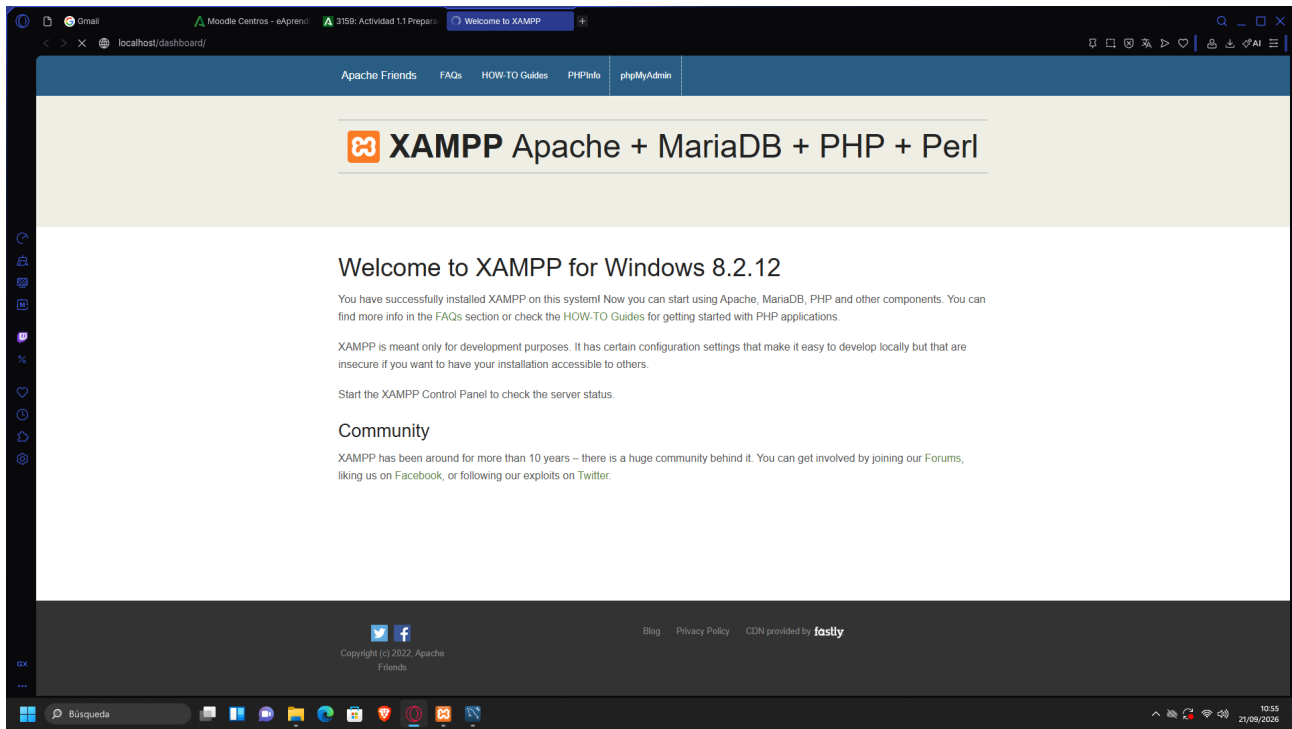

The bottom of the screen shows the Windows taskbar with the search bar and system clock indicating 10:14 on 17/09/2020.

3. Comprobación del worckbench

4. Ejecución de la base de datos maratoon

5. Instalación de las extensiones del VS Code.

Visual Studio Code interface showing the **GitHub Copilot Chat** extension page in the Extensions Marketplace. The extension is by GitHub, with 78,355,677 downloads and a 4.5-star rating. It is described as "AI chat features powered by Copilot". The page includes details, features, and a changelog. A preview window shows the Copilot Chat interface with a code review task for a "Code Review Task Manager Application". The sidebar lists other extensions like GitHub Copilot, GitHub Theme, and GitHub Actions. The bottom status bar shows the file explorer and search bar.

Visual Studio Code interface showing the **Bootstrap 5 Quick Snippets** extension page in the Extensions Marketplace. The extension is by Anbuselvan Annamalai, with 1,621,506 downloads and a 4.5-star rating. It is described as "Collection of Bootstrap 5 Snippets that will make your life easier". The page includes details, features, and a changelog. A preview window shows a code snippet for a Bootstrap 5 form. The sidebar lists other extensions like Bootstrap 5+, Bootstrap 4, and Bootstrap 5. The bottom status bar shows the file explorer and search bar.

Visual Studio Code interface showing the **Extensions Marketplace** with the **Laravel** extension selected. The extension is by **Laravel** (Official VS Code extension for Laravel) and is currently installed. The sidebar lists other related extensions like **Laravel Blade Snippets**, **Laravel Snippets**, **Laravel Artisan**, **Laravel Blade form...**, **Laravel Extra Intelli...**, **Laravel goto view**, **Laravel Extension Pa...**, **laravel-goto-compo...**, **Laravel Create View**, **Laravel Blade Wrap...**, **Laravel Blade Spacer**, and **Laravel Jump Contr...**.

The main panel displays the **Laravel** extension details, including its introduction, LSP Documentation, Installation instructions, and Configuration options. The configuration section shows a snippet for `"laravel.phpEnvironment": "sail"` and `"laravel.memoryLimit": "1G"`.

Marketplace details on the right show the extension's identifier (`laravel.vscodelaravel`), version (`2.0.1`), and publication date (`2 years ago`).

Visual Studio Code interface showing the **Extensions Marketplace** with the **Laravel Blade Snippets** extension selected. The extension is by **Winnie Lin** and is currently installing. The sidebar lists other related extensions like **Laravel**, **Laravel Blade Snippets**, **Laravel Snippets**, **Laravel Artisan**, **Laravel Blade form...**, **Laravel Extra Intelli...**, **Laravel goto view**, **Laravel Extension Pa...**, **laravel-goto-compo...**, **Laravel Create View**, **Laravel Blade Wrap...**, **Laravel Blade Spacer**, and **Laravel Jump Contr...**.

The main panel displays the **Laravel Blade Snippets** extension details, including its introduction, a screenshot of the extension in use, and User Settings. The screenshot shows a code editor with a snippet for `<doctype html>` and `<html lang="en">`.

Marketplace details on the right show the extension's identifier (`onecentlin.laravel-blade`), version (`1.38.0`), and publication date (`10 years ago`).

Visual Studio Code interface showing the **PHP Debug** extension page in the Extensions Marketplace. The extension is by **Xdebug** (xdebug.org) and is currently installing. The main content area displays the **PHP Debug Adapter for Visual Studio Code** details, including a code editor showing a PHP script with a breakpoint and a console output window. The left sidebar lists various PHP-related extensions, and the right sidebar shows the extension's metadata, categories, and resources.

Visual Studio Code interface showing the **PHP Intelephense** extension page in the Extensions Marketplace. The extension is by **Intelephense** (intelephense.com) and is currently installing. The main content area displays the **Intelephense** details, including a list of features and a description of the extension. The left sidebar lists various PHP-related extensions, and the right sidebar shows the extension's metadata, categories, and resources.

Visual Studio Code interface showing the **HTML Format** extension by Mohamed Akram. The extension is installed and active.

HTML Format
Mohamed Akram | 2,160,841 | ⭐⭐⭐⭐ (14)
Format HTML documents.

HTML Format for Visual Studio Code
Formats HTML documents by auto-indenting, wrapping and removing unnecessary whitespace while preserving newlines.

Usage
To format an HTML or Handlebars document you have open, use the **Format Document** command.

Extension Settings
`editor.wordWrapColumn` controls the maximum line length.

Visual Studio Code interface showing the **Laravel Snippets** extension by Winnie Lin. The extension is installed and active.

Laravel Snippets
Winnie Lin | 3,180,015 | ⭐⭐⭐⭐⭐ (11)
Laravel snippets for Visual Studio Code (Support Laravel 5 and above)

Laravel Snippets
Laravel snippets extension for Visual Studio Code (Support Laravel 5 and above version).

Screenshot
Screenshot of a code editor showing Laravel snippets being used in a `web.php` file. The snippets include `Route::get('/', function () { return view('welcome'); });` and `Route::get('users/{id}', function($id) { // });`.

Usage
Snippet prefix follows Laravel Facades. For example: `Request::`, `Route::`

Support Snippet Prefix
